Progress Report 21
for the Period April 1982 to January 1983

and Proceedings of the
21st Project Integration Meeting

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

JPL PUBLICATION 83-48
Handbook of Photothermal Test Data on Encapsulant Materials

R.H. Liang
K.L. Oda
S.Y. Chung
M.V. Smith
A. Gupta

May 1, 1983

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

JPL Publication 83-32
Proceedings of the Flat-Plate Solar Array Project Research Forum on The Design of Flat-Plate Photovoltaic Arrays for Central Stations

(December 5, 6, 7, 8, 1983, at Sacramento, California)

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

JPL Publication 84-44
Progress Report 22
for the Period January to September 1983
and Proceedings of the
22nd Project Integration Meeting

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

JPL Publication 84-2
Photovoltaic Module Encapsulation Design and Materials Selection: Volume II

E. Cuddihy

June 1, 1984

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

JPL Publication 84-34
Chemical Bonding Technology for Terrestrial Photovoltaic Modules

Status to February, 1983

D. R. Coulter
E. F. Cuddihy
E. P. Plueddeman

November 15, 1983

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

JPL Publication 83-86
Department of Energy
Flat-Plate Solar Array Project

21st Project Integration Meeting Handout

Pasadena Center
January 12 and 13, 1982

Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California
D-422
The Application of Encapsulation Material Stability Data to Photovoltaic Module Life Assessment

C. D. Coulbert

April 1, 1983

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

JPL PUBLICATION 83-27
Proceedings of the Flat-Plate Solar Array Project Research Forum on Quantifying Degradation

(December 6, 7, 8, 1982, Williamsburg, Virginia)

June 1, 1983

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

JPL Publication 83-52
Summary of Flat-Plate Solar Array Project Documentation

Abstracts of Published Documents, 1975 to 1986

M. J. Phillips

September 1986

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

JPL Publication 82-79, Rev. 1
Progress Report 21
for the Period April 1982 to January 1983

and Proceedings of the
21st Project Integration Meeting

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory,
California Institute of Technology
Pasadena, California

JPL PUBLICATION 83-48
Summary of Flat-Plate Solar Array Project Documentation

Abstracts of Published Documents, 1975 to June 1982

September 15, 1982

Prepared for
U.S. Department of Energy
Through an agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

(JPL Publication 82-79)
Applications of Ethylene Vinyl Acetate as an Encapsulation Material for Terrestrial Photovoltaic Modules

E.F. Cuddihy  
C.D. Coulbert  
R.H. Liang  
A. Gupta  
P. Willis  
B. Baum

April 15, 1983

Prepared for  
U.S. Department of Energy  
Through an Agreement with  
National Aeronautics and Space Administration  
by  
Jet Propulsion Laboratory  
California Institute of Technology  
Pasadena, California

JPL PUBLICATION 83-35
Photovoltaic Module Encapsulation Design and Materials Selection, Volume I (Abridged)

E. Cuddihy

September 1, 1982

Prepared for
U.S. Department of Energy
Through an agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

(JPL PUBLICATION 82-81)
FSA Field Test Report
1980-1982

H.G. Maxwell
C.A. Grimmett
J. Repar
P.O. Frickland
J.A. Amy

April 15, 1983

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

JPL Publication 83-29
Photovoltaic Module Encapsulation Design and Materials Selection: Volume I

E. Cuddihy
W. Carroll
C. Coulbert
A. Gupta
R. Liang

June 1, 1982

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

(JPL PUBLICATION 81-102)
Photothermal Characterization of Encapsulant Materials for Photovoltaic Modules

Ranty H. Liang
Amitava Gupta
Salvador Di Stefano

June 1, 1982

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

(JPL PUBLICATION 82-42)
Interconnect Fatigue Design for Terrestrial Photovoltaic Modules

G.R. Mon  
D.M. Moore  
R.G. Ross, Jr.

March 1, 1982

Prepared for  
U.S. Department of Energy  
Through an Agreement with  
National Aeronautics and Space Administration  
by  
Jet Propulsion Laboratory  
California Institute of Technology  
Pasadena, California

(JPL PUBLICATION 81-111)
Progress Report 20
for the Period November 1981 to April 1982

and Proceedings of the
20th Project Integration Meeting

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

(JPL PUBLICATION 82-48)
Effect of Loading Rates on the Strength of Silicon Wafers

C. P. Chen

December 15, 1981

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California
Progress Report 19
for the Period July to November 1981

and Proceedings of the
19th Project Integration Meeting

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

(JPL PUBLICATION 82-11)
Department of Energy
Flat-Plate Solar Array Project

19th Project Integration Meeting Handout

Pasadena Center
November 11, 1981

Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California
Progress Report 18
for the Period February to July 1981

and Proceedings of the
18th Project Integration Meeting

Prepared for
U.S. Department of Energy
Through an agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

(JPL PUBLICATION 81-94)
Vacuum Lamination of Photovoltaic Modules

D. R. Burger

January 15, 1982

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

JPL PUBLICATION 81-118
Department of Energy
Flat-Plate Solar Array Project

20th Project Integration Meeting Handout

Pasadena Center
April 21 and 22, 1982

Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California
Photovoltaic Array – Power Conditioner Interface Characteristics

C.C. Gonzalez
G.M. Hill
R.G. Ross, Jr.

December 15, 1982

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

(JPL PUBLICATION 82-109)
An Investigation of the Effect of Wind Cooling on Photovoltaic Arrays

L. Wen

March 1982

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

(JPL PUBLICATION 82-28)
FSA Field Test Annual Report
August 1980-August 1981

Peter Jaffe
Robert W. Weaver
Robert E. Lee

December 15, 1981

Prepared for
U.S. Department of Energy
Through an agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

(JPL PUBLICATION 81-99)
An Investigation of the Effect of Wind Cooling on Photovoltaic Arrays

L. Wen

March 1982

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

(JPL PUBLICATION 82-28)
Progress Report 19
for the Period July to November 1981
and Proceedings of the
19th Project Integration Meeting

Prepared for
U.S. Department of Energy
Through an Agreement with
National Aeronautics and Space Administration
by
Jet Propulsion Laboratory
California Institute of Technology
Pasadena, California

(JPL PUBLICATION 82-11)
